PROFILE

I am a passionate full-stack developer and UI designer with 2+ years of experience creating user-friendly, accessible, and responsive web applications. My expertise lies in JavaScript frameworks and libraries like Next.js (using TypeScript), Node.js (with Express), and React (with Vite), plus additional skills in HTML, CSS, and vanilla JavaScript, which have allowed me to create and manage responsive, reusable, and scalable web applications. Additional skills like UI design in Figma have allowed me to design user-friendly and accessible web and mobile applications that meet user requirements.
